## 150kW 50Hz

### SUBMERSIBLE PUMP

Goodwin submersible pumps have been manufactured since 1982 and are recognised as market leaders in terms of performance and reliability. The pumps have been continually developed over 4 decades resulting in machines that can perform in the most demanding environments.

### Standard Engineering Features

- Single piece cast iron motor housing to enhance rigidity and reduce wear
- 3 phase electric motor runs in oil bath to lubricate and cool the motor parts
- Cooling assisted by the pumped fluid passing through the pump body
- Twin volute casing design to reduce rotational imbalance and increase lifetime of bearings and seals
- Carefully chosen wear resistant materials to maximise service lifetime
- Multiple stage, closed vane impellers
- Precision bearings
- Non pressurised mechanical seal

### Applications

- High wall pumping (open pit) applications
- Construction of buildings, dams & harbour walls
- Long distance pumping applications (up to 4 km)
- Agriculture - irrigation water
- Mine dewatering
- Flood level control - industrial, municipal, mining & marine
- Emergency and environmental control
